

SBS Corp and Persistent Systems to Deliver Digital Transformation in Manufacturing across Europe and North America

Companies team up to reimagine manufacturing processes with Dassault Systèmes portfolio

July 21, 2020, Houston, TX, USA –

Responding to the urgent need to streamline manufacturing ecosystems through digital transformation, Persistent Systems (BSE and NSE: Persistent) and SBS Corp have entered a strategic services relationship to provide advanced manufacturing solutions in Europe and North America.

Clients will benefit from a seamless integration of Dassault Systemes' industry leading product lifecycle management (PLM) and manufacturing operations management (MOM) solutions with Persistent's digital engineering, manufacturing and software integration solutions coupled with SBS Corp's enterprise resource planning (ERP) and MOM implementation expertise.

Manufacturers around the world are looking to reduce costs, improve supplier collaboration, drive agility and gather better field insights for future product iterations and customer support. This has accelerated with the recent disruptions caused by the COVID-19 epidemic.

To do this, manufacturers must improve integration across traditional silos to create a continuous flow of data – a digital thread – that connects the value chain from design and engineering through to

manufacturing and operations. With improved integration, OEMs and suppliers can now produce increasingly sophisticated products faster, at lower cost with smaller, geographically dispersed teams.

Persistent is a global solutions provider delivering digital business acceleration, enterprise modernization and digital product engineering for businesses across all industries and geographies. Connecting data across a unique industrial digital mosaic of cloud-based systems and processes, integrated with legacy systems, Persistent enables clients to benefit from a smooth data flow of consistent, correct and complete data — enhanced by advanced analytics — from design to operations and beyond.

Quote from Jiani Zhang, President, Alliance and Industrial Solutions at Persistent

“We see manufacturers striving for digital continuity across their operations, bringing together ERP, MOM, and PLM. Building on our long-standing relationship with Dassault Systèmes, this trifecta of expertise with SBS Corp adds to our collective abilities to deliver on these highly integrated solutions.”

Quote from Christoph Grauer, Managing Partner, PLM and MFG Operations Practice at SBS

“This collaboration offers a great opportunity, given the needs of the industry in the current times to reimagine enterprise manufacturing for a more integrated digital thread across the spectrum covering digital product design, supply chain, and manufacturing operations. We’re excited to work with Persistent, to create significant value for customers and help them achieve their dynamic business goals.”
